# 750 photovoltaic panels weigh

## Overview

---

What is the average photovoltaic solar panel weight I should expect?

Generally, standard residential photovoltaic panels weigh between 40 and 50 pounds (about 18 to 22 kilograms). This weight makes them manageable, but still requires careful lifting during installation. However, the exact dimensions depend heavily on the panel's technology, wattage, and the manufacturer's design. Solar cell count: 72-cell solar panels intended for commercial installations are. All individual solar panels weigh less than 100 lbs. However, solar systems with 8kW rated capacity and above add more than 1,000 lbs to your roof. 62 square feet and weigh around 40 pounds, excluding the weight of frames and mounting equipment.
