

**PIENAAR ENERGY (PTY) LTD**

# **80120 Photovoltaic panel voltage**

## Overview

---

The number of solar cells in a panel directly impacts its voltage output. This is your typical voltage we put on solar panels; ranging from 12V, 20V, 24V, and 32V solar panels. What is Solar Panel Output Voltage?

Solar panel. Here's what you need to know about voltage for solar panels:  
Open Circuit Voltage (Voc): This is the maximum voltage your panel can produce, usually measured on a bright, cold morning. The Voc is the amount of voltage the device can produce (at 77°F or 25°C). It could be anywhere between 21.
