

PIENAAR ENERGY (PTY) LTD

A flexible photovoltaic bracket

LIQUID/AIR COOLING

PROTECTION IP54/IP55

PCS EMS

BATTERY /6000 CYCLES

Overview

Flexible photovoltaic brackets have several advantages, including large span, multiple spans, resistance to wind-induced vibration, prevention of hidden cracks in the brackets and components, adaptability to complex terrain, increased photovoltaic power station capacity. Flexible photovoltaic brackets have several advantages, including large span, multiple spans, resistance to wind-induced vibration, prevention of hidden cracks in the brackets and components, adaptability to complex terrain, increased photovoltaic power station capacity. The utility model provides a flexible photovoltaic bracket, which comprises at least two bracket bodies, wherein steel beams are longitudinally arranged on the bracket bodies, a plurality of connecting plates are vertically arranged on the side surfaces of the steel beams at intervals along the. The solar panel mount bracket can adjust angle and height, ideal for the installation on irregular surfaces and for the optimal tilt angle of solar panels Bracket angle adjustment range: 0°-180° Bracket height adjustment range: 4"-7" (102-175mm) Material: Aluminum alloy 6063, surface anodizing. As an important part of photovoltaic power generation system, flexible photovoltaic bracket has been paid wide attention in recent years because of its adaptability and high efficiency in complex environment. Flexible photovoltaic bracket refers to a bracket composed of flexible load-bearing cables, steel columns, steel inclined columns or cable-stayed cables, steel beams and foundations.

A flexible photovoltaic bracket

Flexible photovoltaic bracket

Flexible photovoltaic brackets have been proposed to replace traditional beam-supported photovoltaic modules. Flexible photovoltaic bracket refers to a bracket composed of flexible load ...
