

PIENAAR ENERGY (PTY) LTD

Acquisition of photovoltaic cells on the New Third Board

Overview

According to the agreement, Huasun will purchase 1GW of high-efficiency HJT cells from Leascend and supply 180 million pieces of 210 n-type monocrystalline silicon wafers (half-cut). The New Third Board (NEEQ), China's over-the-counter equity market, has become a hotbed for photovoltaic (PV) cell acquisitions. With renewable energy demand surging 18% annually in Asia-Pacific markets, companies like EK SOLAR are leveraging this platform to expand production capacity and optimize. As of Q2 2024, over 35% of photovoltaic (PV) companies listed on China's New Third Board (NEEQ) have reported declining revenues - the worst performance since 2018's "531 New Deal" policy shift. The sector that once produced 11-bagger stocks now sees market leaders like Zhenxin Optoelectronics. On April 11th, Anhui Huasun Energy Co. (Huasun) and Leascend Photovoltaic Technology Co. (Leascend) joined forces to chart a grand blueprint for heterojunction technology (HJT) in the photovoltaic industry. Tommy Xu, Senior Vice President, Vice President Matthew Jin of Huasun, and Xuan. Picture this: A once-dominant solar company, battered by financial storms and regulatory headwinds, chooses to reinvent itself through China's National Equities Exchange and Quotations (NEEQ) - the so-called "Third Board. " That's precisely what Hairun Photovoltaic did in 2024, turning heads across. BEIJING, May 20 (Xinhua) -- Companies listed on China's "new third board," a financing platform for small and medium-sized enterprises (SMEs), have accelerated their innovation drive, with more firms upgraded to the board's innovation layer. External factors such as wind speed, incident ra ctural design and act as shades [209a?
