

**PIENAAR ENERGY (PTY) LTD**

# **Aluminum plate to make solar panels**

## Overview

---

It's not possible to make a functional solar panel with aluminum foil. A solar panel is made from silicon and involves a complex manufacturing process that cannot be replicated with household items like aluminum foil. These materials, known as semiconductors, include silicon, perovskite, gallium arsenide, and others. A solar cell works by using the photovoltaic effect, where light. This comprehensive guide will walk you through the intricate yet rewarding process of creating a solar panel using a surprising hero - aluminum foil. However, there is another important part: its frame.

### How to Make a Solar Panel with Aluminum Foil? (with Pictures)

Creating a solar panel using aluminum foil isn't feasible for electricity generation. While aluminum foil reflects light, it doesn't possess the properties to convert sunlight into electricity like silicon. ...
