Analysis of the current status of solar power generation in Africa

Overview

Africa's solar energy market continues to grow significantly. In 2025, the continent added more than 5,000 MW solar power capacity. The Africa Solar Outlook is designed precisely to respond to this need, offering a concise and pragmatic overview of the realities shaping the solar sector across the African continent. At the same time, for readers wishing to explore specific topics in greater depth, the. Africa added approximately 4.5 GW of new solar PV capacity in 2025, representing a 54% increase from 2024, according to the Global Solar Council. The meeting used the latest figures from African Energy Live Data to analyse the state of the solar power generation sector and examine the. In 2024, 21 African countries generated at least 5% of their electricity from solar, with 7 countries surpassing the 10% mark. The global solar energy market achieved a historic milestone in 2024, adding an estimated 503 gigawatts (GW) of new capacity, bringing the total installed capacity to over 2.
