Overview

With limited mineral resources, the country focuses on renewable energy initiatives, including solar power, to diversify its energy mix and reduce reliance on imports. Andorra's strategic location in the Pyrenees also makes it an attractive destination for regional energy projects. The company aims to submit the proposal to the ministry on the same day, aligning with the winning project from Spain's first Just Transition competition that centers on. The construction of a green hydrogen plant in Andorra by Endesa is moving forward steadily. The Aragonese Institute of Environmental Management (INAGA) has announced that the project, developed by Enel Green Power (EGPE), is now subject to public information for one month and is awaiting possible. Endesa's General Manager for Generation and the company's General Manager for Sustainability presented the plan for the future accompanied by the main protagonists. While its. The Andorra Thermal Power Plant closed in 2020 and its decommissioning was completed in July 2024.
