

PIENAAR ENERGY (PTY) LTD

Are photovoltaic panels installed free of charge

Overview

Solar panels aren't free, but they do generate free electricity and significant savings. Purchasing your system with cash comes with a high upfront cost: A roughly 12 kilowatt (kW) system on EnergySage (the average quoted system size) costs about \$30,505 before incentives. Did you know there are generous tax incentives for Americans looking to install solar panels on their home?

The most common solar tax incentive is called the Investment Tax Credit (ITC). The ITC — also known as the Federal Solar Tax Credit — is a popular tax rebate program offered by the US Federal. Companies that offer “free” solar panels are typically offering solar lease agreements, so you can reap the benefits of solar-powered electricity without dealing with the upkeep and maintenance of the panels.
