Are there too many photovoltaic panels

Overview

Technically, it is possible to have too many solar panels. After all, solar panels are an investment, and it is important to make sure that you are not overspending or installing more solar panels than you need. However, your utility company may place a limit on the amount of electricity your system is allowed to generate. Designing a solar system for your home is more about finding the right size than fitting as many panels on your roof as possible. Understanding this limit is crucial for homeowners, businesses, and energy planners as it directly impacts energy efficiency, cost.
