

## PIENAAR ENERGY (PTY) LTD

# Austria microgrid development

## Overview

---

The Microgrid Research Laboratory in Wieselburg connects technologies such as wood chip boilers, heat pumps and thermal storage with photovoltaic (PV) systems, battery storage, and charging stations for electric vehicles to form a cross-sector microgrid. Austria's security and reliability of supply - with an electricity grid availability of over 99.99% - is among the best in the world. For this, in addition to the availability of sufficient. The research center Silicon Austria Labs (SAL) is advancing innovative DC technologies and DC grids in collaboration with 11 international scientific and industrial partners. These local and regional energy supply concepts can make a significant contribution toward energy independence and more efficient integration of renewable energies into the. CyberGrid provides a cloud-based platform designed for decentralized grids that effectively integrates renewable energy and storage.
