

PIENAAR ENERGY (PTY) LTD

BESS a solar power station in Chile

Overview

Novem- Enel Chile, through its subsidiary Enel Green Power Chile, has initiated construction of the Las Salinas battery energy storage system (BESS), part of an industrial-scale hybrid renewable energy plant that combines three technologies: solar, wind, and storage. Chile Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as. A joint venture (JV) between EDF and developer AME has begun construction of large-scale battery and solar photovoltaic (PV) projects in Chile, with 2GWh storage capacity. The JV, Generadora Metropolitana, announced last week (21 November) that construction has officially begun on the two-project. Spanish renewables company Grenergy Renovables SA (BME:GRE) said it has energised the Gabriela project, the fourth phase of its Oasis de Atacama solar and battery energy storage system (BESS) platform in northern Chile. Gabriela adds 272 MW of solar capacity and 1. Novem- Enel. CJR Renewables is proud to share the success of BESS del Desierto, which was built by the company in 2024/2025 with a peak of approximately 200 workers and is now fully operational! Capacity: 200 MW and 800 MWh. Impact: 280 GWh/year injected into the national power grid.
