

PIENAAR ENERGY (PTY) LTD

Barbados retail store energy storage

Overview

With the current grid unable to absorb more intermittent solar energy, battery storage is the key to unlocking a backlog of projects and enabling 24/7 renewable power. The RFP documents, including all technical and legal requirements, will be available for download starting July 9. The Barbados National Energy Company Ltd. (BNECL), in partnership with the Inter-American Development Bank (IDB), is leading the installation of 10 MW of Battery Energy Storage Systems (BESS) across the island. These will support the national grid for additional renewable energy integration. 24kWh server rack batteries, which provide a total of 184. Installed in a compact container, this energy system combines 18 units of the B-LFP48-200E batteries with 6 Victron Quattro 10kW inverters. The Government of Barbados has officially launched a major procurement process for the country's first large-scale Battery Energy Storage Systems (BESS), aimed at transforming the national electricity grid and unlocking delayed renewable energy investments.
