

**PIENAAR ENERGY (PTY) LTD**

# **Barbados solar container outdoor power recommended cost-effective**

## Overview

---

Standardized plug-and-play designs have reduced installation costs from \$80/kWh to \$45/kWh since 2023. Smart integration features now allow multiple containers to operate as coordinated virtual power plants, increasing revenue potential by 25% through peak shaving and grid. The Ministry is committed to developing a viable and competitive sustainable energy sector, through targeted and strategic renewable energy and energy conservation initiatives. The focus of the Ministry is to advance legislation, policy and programmes to give life to Government's stated policy of. One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is "high". Both projects were built in partnership with the Barbados Water Authority. Barbados has launched an ambitious \$11.6 billion energy plan to make solar power its primary energy source by 2030. This initiative, a major update in Barbados's energy news, aims to enhance the country's energy capacity, modernize infrastructure, and achieve energy independence.
