

**PIENAAR ENERGY (PTY) LTD**

# **Base station battery for mobile communication**

## Overview

---

Communication base station batteries are specialized energy storage units designed to power cellular towers and related infrastructure. They typically include lead-acid, lithium-ion, or other advanced chemistries, optimized for longevity, reliability, and quick charge/discharge. In modern power infrastructure discussions, communication batteries primarily refer to battery systems that ensure uninterrupted power in telecom base stations and network facilities, rather than consumer or handheld communication devices. While the grid supplies the primary power, these base stations must have a backup plan in case of outages or voltage instability. Communication iron tower system is an important part of communication infrastructure. High-capacity batteries ensure continuous service, especially for critical systems like 5G networks that demand low latency and high availability.

## Base station battery for mobile communication

- LlFePO<sub>4</sub>
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

### 48V 50Ah Mobile Communication Base Station Lithium Iron ...

48v 50Ah mobile communication base station lithium iron phosphate battery cell Model: Fe25Ah/25Ah/3.2V battery Specification: Fe25Ah-15S2P/48V/50Ah nominal Voltage: 48V nominal ...
