Base station site coordination process

Overview

Stationing decisions are made through a systematic process that considers operational needs, resource availability, infrastructure, environmental impacts, and other relevant factors. The process involves coordination among multiple Army organizations, commands, and. ations Planning: Air Expeditionary Force and Global Force Management, and provides guidance for preparing base support pla and site survey plans. It ensures the efficient and effective use of Army resources and supports the Army's operational and readiness objectives. Who is responsible for implementing AR 5-18?

. When establishing a forward operating site (FOS), forces are presented in standard force modules that are tailored based on the planning process performed by the air component commander's staff. Establishes policy, assigns responsibilities, and provides procedural direction for the sustained operations of and provision of installation management and support functions (ISFs) at joint bases (JBs) and the joint. The MILCON process involves DOD and Congress acting together to build military facilities, beginning with development of new military infrastructure requirements and culminating in a completed facility. The lengthy and complex process can take five to seven years or more. Summarized, the MILCON. This publication sets forth the joint tactics, techniques, and procedures (JTTP) necessary for the defense of joint and single-Service bases outside the continental United States (CONUS) and outside the states of Alaska and Hawaii.

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

DETAILS AND PACKAGING

-  USER MANUAL PDF
-  RJ45 Cable For RS485/CAN
-  Battery in Parallel Cables
-  RJ45 TO USB Monitor Cable
-  M8 Terminal*4

Base Station Project Management

For the 7S model, key issues are developing an effective strategy for the remote site, determining an optimal organizational structure, and ensuring reliable systems given the location.
