

**PIENAAR ENERGY (PTY) LTD**

# **Basic energy management system**

## Overview

---

An Energy Management System (EMS) is a strategic framework or software solution designed to monitor, control, and optimise energy consumption in real time. EMS provides organisations with actionable insights to improve energy efficiency, reduce costs, and achieve sustainability. The decision to use this eGuide as a tool to support the implementation of an EnMS begins with understanding the basics of an EnMS. By leveraging advanced technologies, EMS not only enhances operational efficiency but also supports long-term environmental stewardship goals.
