Basic knowledge of photovoltaic brackets

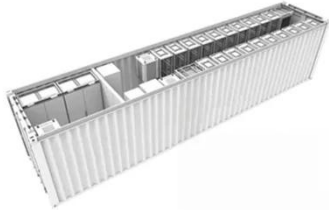

Overview

The photovoltaic bracket is the “skeleton” of solar power stations. It supports and secures solar panels, enhancing system efficiency and stability. What is a Photovoltaic Bracket?

A photovoltaic bracket is a structure used to install and fix. Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. The general materials include aluminum alloy, carbon steel, and stainless steel.

Basic knowledge of photovoltaic brackets

The Use and Function of Solar Photovoltaic Bracket

The long-term stability and safe operation of the solar photovoltaic system can be ensured by selecting the appropriate solar photovoltaic bracket and correctly installing and ...

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Components and classification of solar photovoltaic brackets

Solar photovoltaic brackets come in two main types--fixed and adjustable. Fixed brackets are designed to hold the solar panels at a predetermined angle, typically suitable for regions ...
