

PIENAAR ENERGY (PTY) LTD

Battery solar container energy storage system off-grid

Overview

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client requirements demand it. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. They save extra solar energy when there is too much and give it back when there is not enough. These turnkey solutions integrate solar panels, inverters, batteries, charge controllers, and monitoring systems into a single transportable unit that. Whether you want to reduce the electricity bill, build reliable power supply for remote residences, or have backup power in the event of a power outage, an efficient off grid solar battery system may be your long-term solution. It enables organisations to store and deploy energy at the scale required for modern energy infrastructure, from renewable energy parks to industrial sites and grid-related projects.

Battery solar container energy storage system off-grid

Battery Containers for Large-Scale Energy Storage

A battery container is a robust and scalable solution for large-scale energy storage. It enables organisations to store and deploy energy at the scale required for modern energy infrastructure, from ...

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
