

PIENAAR ENERGY (PTY) LTD

Bolivia Solar Electricity System

Overview

This project is a joint effort between the Bolivian government and the Inter-American Development Bank (IDB). The Board of Directors of CAF, Development Bank of Latin America and the Caribbean, approved. Bolivia is making significant strides in rural electrification with a \$325 million investment in renewable energy. Announced by the government, this ambitious project will install solar panels in rural areas, aiming to provide electricity for 20,000 families across 110 communities in 35. Verónica is a young woman from Santiago de Callapa, a small village near La Paz, where 7,000 people live in the arid and cold landscape of the high planes, at an altitude of 3,800 meters above sea level. She is Secretary of the nation-wide organization, Bartolina Sisa Women Confederation, and part. The Altiplano plateau in western Bolivia has some of the world's highest and most consistent levels of solar radiation, creating high potential for solar photovoltaic power in the region, but structural challenges may prevent scaling. Its use reduces dependence on fossil fuels, lowers the carbon footprint, and contributes to energy autonomy for businesses and households.

ENERGY STORAGE SYSTEM

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

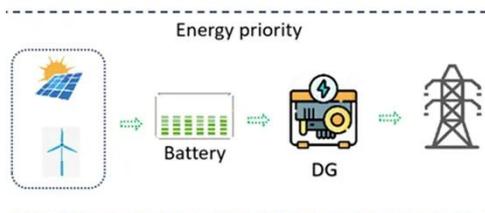

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Bolivia's Photovoltaic Energy Storage Revolution: Powering the Future

Did you know Bolivia's Altiplano region receives 6.5 kWh/m² of daily solar radiation - among the highest globally? Yet paradoxically, 32% of rural communities still lack reliable electricity access.
