

PIENAAR ENERGY (PTY) LTD

Bolivia has the most lithium battery site cabinets

Overview

The Salar de Uyuni, spanning over 10,000 square kilometers, constitutes the crown jewel of these deposits, containing more untapped lithium riches in Bolivia than any other single location on Earth. This represents roughly one-quarter of global lithium resources. Bolivia's Salar de Uyuni holds more lithium than anywhere else on Earth, and that matters because lithium powers the batteries in electric cars, phones, and laptops. As the world rushes to mine this white gold, a serious environmental problem is quietly building beneath the shimmering salt flats. The Andean nation opened its first industrial-scale plant in late 2023, built by a. On the morning of 20 January 2023, President Luis Arce declared that Bolivia's "era of industrialisation" for its vast lithium reserves had begun. Speaking to an audience at the Casa Grande del Pueblo – the seat of government, in La Paz – Arce made the bold claim that by the first quarter of 2025.
