# **Brussels renewable energy growth**

## Overview

---

Solar energy production in Belgium rose by 21 per cent in 2025, reaching a record high. As a result of this increase, the share of renewable energy in Belgium's electricity mix is now almost as high as that of nuclear energy. Both account for around 34 per cent, according to figures from. Belgium can build on its current momentum: while quadrupling acceleration of the rate of decarbonization compared with that of 1990 to 2019 is required in the coming decades, Belgium has already been accelerating across sectors in recent years. For over a decade, the country has seen. VILVOORDE, Belgium — Nestled behind two towering cooling structures at a decommissioned gas power facility lies a solution to one of the European Union's pressing challenges: the alarming waste of energy resources. A vast array of rectangular containers, each weighing 26 tons and extending into the. This report is a collaborative effort by Frank Bekaert, Tom Clauwaert, Nicolas Denis, Matthias Dossche, Morgane Janssens, Ken Somers, Frederic Vandenberghe, and Tim Vroman, representing views from McKinsey's Sustainability Practice. \*Note: As of Final updated National Energy and Climate Plan (NECP) 2021-2030.
