Butterfly solar power generation design

Butterfly solar power generation design

Solar technology with the beauty of butterfly wings

Inspired by the phenomenon that causes the shimmering shades of blue or green of the wings of the morpho-butterfly, the underlying mechanism of spectrally selective reflectance allows the finished ...

How butterfly wings could revolutionise solar power , Interviews

That's where our first two butterflies come into play. The more light you can get to hit a panel, the more energy you can produce. Thanks to work supported by UK Research and Innovation, ...
