Cambodia Microgrid Subsidy

Overview

The Rural Electrification Fund (REF), established in 2004 to accelerate the development of rural electrification in Cambodia, has continued to deliver its programmes under collaboration of both government and external parties. While the country has seen relatively strong economic growth over the last two decades, a majority of the population lives in under-resourced. The solar mini grid in Jarai indigenous community in Phi village along the Sesan River in Ratanakiri province, supported by the Government of Japan. FTA is CTCN's short time response to requests referring to technology prioritization, endogenous technologies assessment, policies and measures that are immediate priorities for Cambodia. The study was carried out by experts from The Energy and. HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers. With Okra, the extra power that's not being used by one home can be shared with the community meaning more people will have access to energy for.
