

**PIENAAR ENERGY (PTY) LTD**

# **Can I bring 220v solar container outdoor power to Bolivia**

## Overview

---

Because the voltage is different in Bolivia you need to bring a power converter for Bolivia if your device isn't dual voltage. If your device is 115 volts or is dual voltage and the plug fits in a Bolivian power outlet then you can use it in Bolivia without needing anything else. In Bolivia, they use power outlets and plugs of type A and type C. The type of plug adapter, converter or charger that's needed when visiting Bolivia all depend on the voltage and type of device that you're attempting to charge with a Bolivian. This normally includes the use of a travel adaptor, which is a device that simply allows you to plug any UK electrical appliance into a foreign electrical socket. It is important to note that it does not convert the voltage or frequency.
