

**PIENAAR ENERGY (PTY) LTD**

**Can I connect to the grid  
without installing photovoltaic  
panels**

## Overview

---

It lets you access solar energy without installing your own rooftop solar system. So when I want to connect to one or the other I flip a switch or something along those lines?

I use several ATs (automatic transfer switches) to connect my off-grid solar to the house. When the PV -> battery charges up enough to turn on the Inverter - the Inverter power flips the ATs from grid to. I'd like to add a solar system to our home, but the local power company will not allow any more homes to connect to the grid for solar. Does this make. Not connected to grid, solar through house circuit possible?

I got 16 370W NEC panels, and I'm slowly learning what the regulations are and permits required. You can disconnect if you don't require electricity 24/7 or if you're able to produce your own electricity.

## Can I connect to the grid without installing photovoltaic panels
