

PIENAAR ENERGY (PTY) LTD

Can I install photovoltaic panels on the roof privately

Overview

In most cases, no, you do not need to apply for planning permission to install solar panels on your roof. Typically, it's considered permitted development and shouldn't affect neighbors in any meaningful way. In this guide, we're going to take you through all the benefits of installing solar. Installing your own solar panels can be legal and cost-effective, but navigating the regulations requires careful planning. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional. Solar panels can't be put on a roof without first having mounting brackets installed. The solar panels are shielded from the elements by the mounting and solar racking system, which can. Typically, solar panels perform best on south-facing roofs with a slope between 15 and 40 degrees, though other roofs may be suitable too. This guide is for educational purposes. We strongly recommend hiring certified professionals for safety, warranty protection, and code compliance.
