Can I put a ladder on the roof photovoltaic panel

APPLICATION SCENARIOS

Overview

Secure a sturdy extension ladder against the roofline. If a friend is helping, one of you can push from below while the other. For homeowners and contractors aligning solar panel projects, combining ladder stability with solar panel mounting or charging accessories can simplify installations and maintenance. This guide highlights five Amazon products that help you lift, stabilize, and power solar panels safely from ladders. For example, if you're working on a flat roof, you can use the ladder in an A-frame configuration to give you a stable base. On the other hand, if you're dealing with a pitched roof. Petehimself of HBPowerwall fame mentioned in his live stream today something about having issues lifting PV panels onto the roof, so I thought I'd share "my" (*1) method. I use this to lift up 18kg panels onto my 3.7m tall roof, all by myself! It should be obvious how it works, but still. The design shown in the video was unchanged. The most important part of this method is making sure your ladder is accurately padded with no gaps.
