

PIENAAR ENERGY (PTY) LTD

Can I remove the solar power generator after installing it

Overview

Safety: Never attempt to remove a solar system yourself; it involves high voltages and complex equipment. The electrician put the transfer switch by the pedestal and ran power down from the generator which is off in a different direction. Normally I would either tie the solar into a line-side tap on the utility side of the transfer switch or connect the solar to the main panel by way of a normally open. Removal is the process of temporarily removing solar panels or the entire system from your home. Reinstallation is the process of reinstalling solar panels after reroofing, remodeling or relocation. Timelines may vary depending on the scope of work and crew availability, so we recommend starting. Are you adding a standby generator to a home equipped with solar power?

Before you do, understand that generators can't operate while solar systems are operating, or it will damage your solar panels. Here's how it typically unfolds: 1. System Check Before work begins, our technicians make sure your system is working properly.
