

PIENAAR ENERGY (PTY) LTD

Can photovoltaic panels be washed on sunny days North

Overview

Late afternoon: The sun isn't as intense, and panels are cooler. Avoid cleaning when it's very hot. Specifically, we're talking about the silent thief of solar efficiency—the dirt, dust, pollen, and grime that inevitably accumulate on your panels. This phenomenon, known as “soiling,” may seem minor, but it can significantly reduce your energy production and cost you real money. This guide is. Quick answer: Solar panels don't need frequent cleaning in most regions. To keep your solar panels working effectively, it's a good idea to wash them once or twice a year or whenever they're particularly dirty. Coastal zones may get salt residue. If you live near a lot of.
