

## PIENAAR ENERGY (PTY) LTD

# Can solar power generation pay for itself

## Overview

---

For the vast majority of homeowners with properly sized systems, yes—not only do solar panels pay for themselves, but they usually generate tens of thousands of dollars in profit over the system's 25+ year lifespan.

Determining your potential savings can be difficult to conceptualize and calculate if you've never installed solar before. To help you see how much you could save, this. Let's probe into the fascinating world of solar generators and uncover whether they can indeed pay for themselves over time. Many rooftop solar systems will pay for themselves in five to 10 years using a simple cost-benefit. Many homeowners and businesses considering solar installations wonder: will solar pay for itself?

Let's explore the factors that determine the financial viability of solar energy systems.

## Can solar power generation pay for itself

---

### Whether home solar power "pays for itself" isn't the point.

Many rooftop solar systems will pay for themselves in five to 10 years using a simple cost-benefit calculation, but that only tells us part of the story. We need to factor in a variety of
