

## PIENAAR ENERGY (PTY) LTD

# Can the energy storage battery be used directly

## Overview

---

Battery energy storage systems can gather and store energy from either the grid directly or from an adjoining solar farm or other power source. The energy is stored in rechargeable batteries and then can be strategically deployed when needed most. Why are battery storage systems useful?

BESS (Battery Energy Storage Systems) consist of groups of batteries connected both to a power. Battery storage is quickly becoming the backbone of renewable energy systems, ensuring that we can store excess energy when it's available and use it when it's not. However, fires at some BESS installations have caused concern in communities considering BESS as a. Energy storage batteries (lithium iron phosphate batteries) are at the core of modern battery energy storage systems, enabling the storage and use of electricity anytime, day or night.

### ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled
