

## PIENAAR ENERGY (PTY) LTD

# Can tool lithium batteries be charged from the output end

## Overview

---

The best way to charge an 18V Milwaukee Lithium battery is by using an old 18/20V laptop charger or a variable DC voltage adapter that can provide an 18V DC output. Using a universal drill battery charger is another cheap and VERY-SAFE method of charging an 18V. By the end, you'll know exactly how to charge your power tool battery for maximum performance and longevity. Types of power tool batteries: which one are you using?

Need help choosing?

Contact our battery experts Part 2. 7 Volts in its discharged state. 18/20V Lithium battery has five cells connected in series. 0 V. This comprehensive guide explains how to charge lithium battery correctly, covering key topics like battery chemistries, charging stages, safety protocols, compatible chargers, and troubleshooting. Once the cells are fully charged, the charger will stop sending current through them, and the battery. Batteries can be charged manually with a power supply featuring user-adjustable voltage and current limiting.
