

**PIENAAR ENERGY (PTY) LTD**

# **Canada Valley Power Energy Storage Project**

## Overview

---

The proposed Project is a lithium-ion battery energy storage system connected to Hydro One Network Inc.'s existing transmission electrical infrastructure. There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role. EDWARDSBURGH CARDINAL — Construction is now underway on the single largest battery storage facility ever procured in Canadian history, supporting the Ontario government's plan to deliver reliable, affordable and clean energy to power the province's growing economy and communities. Once complete, Cedar Valley Energy Storage LP (the "Proponent"), along with its development partner Baseload Power LP, is developing the Cedar Valley Energy Storage Project (the "Project") in the Township of Rideau Lakes, Ontario. Once a source of iron ore, the Marmoraton Mine near the town of Marmora has re-emerged as a potential hub for long-duration energy storage. Canada had 138MW of capacity in 2022 and this is expected to rise to 296MW by 2030.
