

**PIENAAR ENERGY (PTY) LTD**

# **Carbon felt for all-vanadium redox flow batteries**

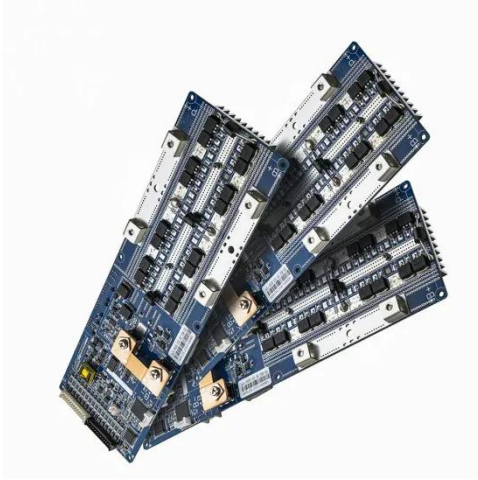

## Overview

---

A high-performance carbon felt electrode for all-vanadium redox flow battery (VRFB) systems is prepared via low-temperature atmospheric pressure plasma treatment in air to improve the hydrophilicity and surface area of bare carbon felt of polyacrylonitrile and increase the contact. A high-performance carbon felt electrode for all-vanadium redox flow battery (VRFB) systems is prepared via low-temperature atmospheric pressure plasma treatment in air to improve the hydrophilicity and surface area of bare carbon felt of polyacrylonitrile and increase the contact. All-vanadium redox flow batteries (VRFBs) are one of the future strategic energy storage technologies for large-scale applications.

## Carbon felt for all-vanadium redox flow batteries

---

### Investigating the Influence of Treatments on Carbon Felts for Vanadium

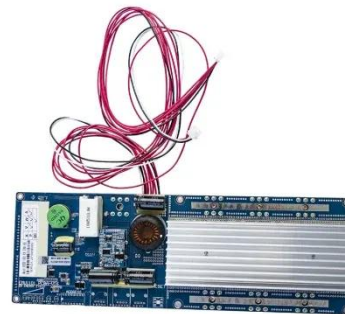

Vanadium redox flow battery (VRFB) electrodes face challenges related to their long-term operation. We investigated different electrode treatments mimicking the aging processes during ...
