

PIENAAR ENERGY (PTY) LTD

Cement blocks for photovoltaic brackets

Overview

Concrete solar ballast units are used for flat ground and roof-mounted applications requiring ballast weight to secure panel arrays and provide the dispersion of point loads without the need for roof or foundation penetration. is proud to offer concrete block solutions for photovoltaic mounting systems. Trusted and used by professional solar energy system installers and designers where concrete ballast block are required. Whether you're looking for additional product information or design assistance, or you're ready to get a personalized quote, our. Do you need to hold down ground mounted solar panels?

Conigliaro Block manufactures all types of precast concrete solar ballast blocks used to securely mount and position solar panels. It is suitable for using in home or large commercial solar project. Each solar ground mounting system no need cut or drill on site, it could be realized the cost-effectiveness and flexibility in installation.

Cement blocks for photovoltaic brackets

12.8V 100Ah

Solar Ballast Blocks

These durable, easy-to-install blocks are designed specifically to keep solar arrays firmly in place, providing a strong foundation that doesn't require roof penetration.
