

**PIENAAR ENERGY (PTY) LTD**

# **Charging of six solar container lithium battery packs**

## Overview

---

In this article, you'll learn how to effectively charge your lithium batteries with solar panels. We'll break down the steps, tools, and tips you need to make the process smooth and efficient. I configured six, 24v batteries (8 cells each) into a bank of 48 cells (6P8S). I have bought 4 off Li Time 12v 100AH LiFePO4 Trolling Motor and then bought two. How do you charge a lithium ion battery pack?

When charging a battery pack made up of several lithium-ion cells in series, always use a charger designed for the combined voltage. For example, if you have three 4. The variation in these batteries is that they work in a wide range of voltage. It's frustrating, but there's a simple solution: using solar panels to charge lithium batteries. This eco-friendly method not only keeps your gear powered up but also taps into renewable energy.
