

PIENAAR ENERGY (PTY) LTD

China-europe wind power energy storage

ESS

Overview

In a recent report published by the Oxford Institute for Energy Studies, we explore whether Chinese wind turbine companies are competitive in Europe and the real risks and benefits of Chinese participation in European offshore wind markets. But their focus is increasingly shifting to the continent, which some are concerned could hollow out the one clean-energy industry in which Europe is still competitive. Competition. Let's face it—the energy transition is like a high-stakes relay race, and energy storage projects are the baton passing between China and Europe. Yet, China and Europe—two leaders in renewable adoption—still face critical gaps in synchronizing their storage policies. 8 gigawatts, 40% of the global total.
