

PIENAAR ENERGY (PTY) LTD

China s solar and wind power generation ratio

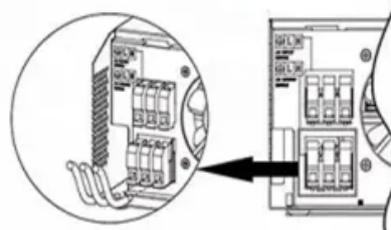

Parallel (Parallel operation up to 6 unit (only with battery connected))

AC input wires

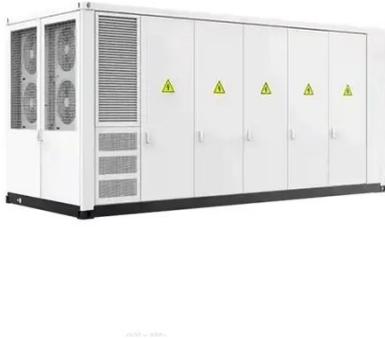

AC output wires

Overview

China achieved a new milestone in its energy transition, with wind and solar power together generating a quarter (26%) of the country's electricity in April 2025, the highest monthly share on record, according to the latest data from global energy think tank Ember. China is cementing its position as the global leader in renewables development with 180 GW of utility-scale solar and 159 GW of wind power already under construction 1. This surpasses the previous. 9. 6GW, accounting for 74%, with wind additions of 9. 1GW or 17%, while thermal power only made up 7%, marking a 6% decline yo   Figure 1. China's National Energy Administration (NEA) released its 2025 power sector statistics on Jan. 4 terawatts (TW) - that's roughly a third of the entire world's 4.

China's solar and wind power generation ratio

Wind and Solar Reach 25% Share of China's Electricity Mix

China reached a significant renewable energy milestone in April, with wind and solar power together generating 26% of the country's electricity, marking the first time these sources have supplied more ...
