

PIENAAR ENERGY (PTY) LTD

China solar powered generator in Oman

Overview

In 2024, China's JA Solar unveiled plans to set up a gigawatt-scale solar cell and module manufacturing facility in Oman, while Hainan Drinda New Energy Technology Co. said it would build a factory for the production of up to 10 GW of TOPcon solar photovoltaic. On May 23, People's Daily published an article titled "Exploring Oman's Largest Renewable Energy Project", which reported on the IBRI II Photovoltaic Project in Oman, constructed by POWERCHINA. The Ibri II Solar Power Plant in Oman's Dhofar Governorate is the country's largest renewable energy. China's Central New Energy Holding Group has signed a memorandum of understanding (MoU) with data centre operator EGN to jointly invest in solar power projects in Oman and explore establishing local photovoltaic module manufacturing. It is the latest in a series of green energy initiatives as the sultanate aims to diversify from fossil fuels and power green hydrogen ambitions. The company, through its subsidiary JTPV, will invest \$700 million to build a 10 GW factory dedicated to TOPCon solar cell production. This project will be constructed in two phases, each with a capacity of 5 GW.
