

PIENAAR ENERGY (PTY) LTD

Cleaning up solar photovoltaic panels

Overview

To clean solar panels, start by turning off the system for safety. Then, remove any loose debris with a brush or leaf blower. Solar panels are a cornerstone of renewable energy, converting sunlight into electricity to power homes and businesses. However, their efficiency hinges on a clean surface. Dust, dirt, pollen, bird droppings, and other debris can reduce energy output by 15–25%, according to the National Renewable. With the changing seasons come new routines and practices: Raking leaves, clearing the gutters—and cleaning your solar panels to maximize their energy production. professional approaches and seasonal maintenance tips for optimal performance.

Before cleaning solar panels,
homeowners will want to make sure they
have the right tools and equipment and
feel comfortable handling the task. Next,
homeowners will need to power the solar
panels off before removing any loose
debris or dust with a soft brush. The next
step is for the homeowner to spray down
the panels with a hose and scrub any
problem areas gently with a soft brush
and water, or a special cleaning solution
for heavily soiled areas. Homeowners will
then want to dry the panels with a soft
cloth or squeegee before restarting the
system. See more
