# **Congo promotes solar panels**

## Overview

---

The Democratic Republic of Congo (DRC) is embarking on an ambitious renewable energy strategy, committing to a major solar initiative to address the country's significant power challenges. A key part of this is the newly launched Mwindi Fund, a \$500 million program designed to finance solar home. The Republic of Congo has implemented a number of initiatives in recent years to diversify its energy matrix and expand the share of renewable energy. Mini-grids are small-scale electricity generation and distribution systems that operate independently from the grid. Indian IPP, Soleos, in collaboration with Melci Holdings, has announced the development of a 200MW solar photovoltaic (PV) project in the Democratic Republic of Congo (DRC). The US\$ 200 million project will be located in Fipango village, within the Kipushi territory in Haut-Katanga province. This project aims to expand sustainable energy access in underserved areas. Funded by the United Nations Development Program (UNDP) with a nearly.
