

PIENAAR ENERGY (PTY) LTD

**Contracting status of solar
power generation in the whole
line**

Overview

In the third quarter of 2025, solar projects representing about 20% of planned capacity reported a delay, a decrease from 25% in the same period in 2024, based on data compiled from multiple Preliminary Monthly Electric Generator Inventory reports. • At the end of 2024, global CSP capacity reached approximately 7 GW ac, with virtually all installed CSP capacity (three projects, totaling 250 MW ac) located in China. — 150MW solar * project in Dodge County, GA (Southern Company). Proposed completion changed from Ap— 150MW solar * project in Taliaferro County, GA. Purpose of Review As the renewable energy share grows towards CO2 emission reduction by 2050 and decarbonized society, it is crucial to evaluate and analyze the technical and economic feasibility of solar energy. 1 Under an EPC Contract, a Contractor is obliged to deliver a complete facility to the Project Company. The Project Company needs only to turn a key to start. The passage of the Inflation Reduction Act (IRA) supports the growth of US renewables at an unprecedented pace. Solar, storage, and onshore wind capacity could reach more than 1,240 gigawatts (GW) over the next decade, growing 2. 7 times faster than projected before the IRA took effect (Exhibit 1).

Contracting status of solar power generation in the whole line

EPC contracts in the solar sector

A construction contract: An EPC Contract is one contractual approach that can be taken to construct a solar facility. Another option is a disaggregated approach with, for example, a supply contract, a ...
