

PIENAAR ENERGY (PTY) LTD

Customer energy management system

Overview

EMS integrates with systems like HVAC, lighting, and industrial processes to provide real-time insights, automate controls, and identify inefficiencies. Today EMS reads meters across the entire United States and provides a multitude of other energy related solutions to our commercial, office, retail, and multi-family property owners and managers. Some of our solutions include design, supply, install, and servicing of submeter and high efficiency. Energy management systems have become essential tools for businesses and organizations looking to reduce energy costs, improve operational efficiency, and minimize their environmental impact. With energy demand expected to grow as much as 18% by 2050 according to McKinsey research, it is time for businesses to get on top of where their energy is going. Each player in the space has new challenges and opportunities arising at the moment as new flexible value pools surpass traditional ones.
