

**PIENAAR ENERGY (PTY) LTD**

# **Differences in the grades of photovoltaic panels**

## Overview

---

Grade A solar panels are entirely free of defects. Naturally, this system leads to many interpretations of visual and performance. Learn how solar panels are graded (A, B, C, D), their applications, and why quality matters. At Sova Solar, we're often asked: "Why not just go with a cheaper panel if it's still 300W?"

" The answer lies in what you're really paying for — and how Grade. The grades of solar photovoltaic panels can be divided into A grade, B grade, C grade, and D grade, and A grade components can be divided into two grades, A+ and A-.

## How to Identify the A, B, and C Grades of Solar Panels

Some module factories will have strict factory inspections during the production of photovoltaic modules, and divide the modules into A, B, C, and D grades according to their performance and appearance.

## grade of solar cell

There are 4 levels of quality of solar silicon cells, called "Grade" - A, B, C, and D. Elements of different classes differ in their microstructure, which in turn affects their parameters and longevity.

## Solar Panels Grade: Understanding the Quality Levels

Understand the differences between A,

- LiFePO<sub>4</sub>
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

B, C, and D grades, and learn the factors to consider when judging the appearance and purchasing solar panels.
