

PIENAAR ENERGY (PTY) LTD

Direct connection of batteries to solar panels

Overview

Yes, you can connect a solar panel directly to a battery, but it is not advisable. Direct connections may cause overcharging, which can generate excess heat and damage the battery. If you're looking to harness the sun's energy for your devices or storage, understanding how this connection works. Connection sequence is critical for equipment safety - Always connect batteries to charge controllers before solar panels. This setup allows you to use solar power when the sun isn't shining, such as during nighttime or cloudy weather.
