

**PIENAAR ENERGY (PTY) LTD**

# **Do photovoltaic panels need to be tied up**

## Overview

---

The short answer is it could, but a home's solar panel system doesn't have to be connected to the grid. You can disconnect if you don't require electricity 24/7 or if you're able to produce your own electricity. The utility connection for a PV solar. Grid-tied solar dominates the market for good reason: With 2025 system costs ranging from \$2.00 per watt installed and federal tax credits of 30% through 2032, grid-tied systems offer the fastest payback periods (6-10 years) and highest returns on investment without requiring expensive. Grid-tied solar energy systems are an eco-friendly way to power your home while remaining connected to the electrical grid, but there are trade-offs involved. We'll take a look at how grid-tied systems work, how they compare to your other options and whether they're a financially sound decision.

## Do photovoltaic panels need to be tied up
