# **Do solar panels installed on the roof use electricity**

## Overview

---

Roof solar panels, also known as photovoltaic (PV) panels, are devices installed on the roof of a building to capture sunlight and convert it into electricity. These panels are made up of individual solar cells that work together to generate clean, renewable energy for your home. You might have already thought of some of them, but there could be some surprises here, so keep reading! We will start with an obvious benefit: saving money. If you are generating your. Rooftop solar turns unused space into a clean energy source that lowers costs and increases home value.
