

PIENAAR ENERGY (PTY) LTD

Do you need to wipe the photovoltaic panels

Overview

In general, you should clean your solar panels about every six months—but it really depends on your location. If they're lying flat, there's a higher probability of. Cleaning and maintaining solar panels is crucial for their efficient operation. Proper cleaning methods not only extend the life of the equipment but also maximize energy output. If they get dirty or build up layers of grime and dust over time, those pollutants and particles will prevent your panels from absorbing as much sunlight as possible. Rain often removes light debris, but dust, pollen, bird droppings, or snow buildup can reduce output over time.
