

**PIENAAR ENERGY (PTY) LTD**

# **Does Morocco have wind and solar complementary communication base stations**

## Overview

---

Construction of wind and solar complementary project for communication base stations in Morocco toward 2020 and other farms to 2030 with a total capacity of 1000 MW in Tangier. In September 2021, Xlinks stated that they "have secured with the Moroccan government an area of about 1,500 km [580 square miles] for a combined wind and solar farm in Morocco". 8 GW HVDC connections to the in Devon. According to the National Electricity Regulatory Authority (ANRE), Morocco's electricity production in 2023 came from coal (64 percent), hydroelectricity (0. In 2009, the Kingdom passed major reforms designed to dramatically increase its renewable electricity capacity. It has 831 MW from solar and 1,553 MW from wind. The Noor Ouarzazate Solar Complex is a key project for Morocco. Morocco is investing heavily in developing its renewable energy sector, which will reduce its dependence on imported. Solar power in Morocco is enabled by the country having very high rates of solar insolation — about 3,000 hours per year of sunshine, which rises to 3,600 hours in the desert.
