# **Does the cvt transmission have an energy accumulator**

## Overview

---

In 1958, the Dutch became the first mass-production car to use a CVT. Its transmission was used in several vehicles built by DAF and Volvo until the 1980s. In 1987, the ECVT, the first electronically controlled steel-belted CVT, was introduced as an optional transmission on the, Production was limited to 500 units.
